

“I WANT TO HELP THE DISABLED REGAIN THEIR MOBILITY.”

I started working on an autonomous wheelchair as a sophomore. It's a challenging project. From something like the slightest wiggle of a finger, we're trying to perform very complex tasks—moving the chair from one room to another with the desired speed and control.

It's a really big goal, and I love it. This is my chance to leave my mark and have an impact.

Chris Miller credits his work on the autonomous wheelchair with pushing him to learn and explore new areas. "Penn State has a place for everyone. You're going to get the education," he says, "and do the research you want."

CHRIS MILLER: Electrical Engineering major, Intelligent Vehicles and Systems Group, Schreyer Scholar, Penn State student chapter of the Institute for Electrical and Electronics Engineers

Every Penn Stater has a story built of events and opportunities. For Chris Miller, that story includes his selection for the Schreyer Honors College, receiving an offer to conduct research in Dr. Sean Brennan's Intelligent Vehicles and Systems Group, and serving as president of the Penn State chapter of a student engineering society.

"Penn State has helped me become not only a good student but also a great engineer, a great researcher, a great leader, and a better person," Chris says. "My dream is to one day own and run my own robotics research firm—and because of what I've learned here, I am confident I can achieve that goal."

If you're ready to think about a college experience that is uniquely Penn State—one that will inspire you to apply what you learn to change lives, including yours—get started today by visiting **admissions.psu.edu/achieve**. Create a MyPennState profile, and we'll send you more information about how Penn State can help you learn for a lifetime.

So, Jeremiah,
